### PARTS LIST

HEL PERFORMANCE CATCH CAN  
YARIS CATCH CAN BRACKET & HARDWARE  
AN10 BANJO ADAPTER  
AN10 ORB-JIC MALE ADAPTER  
STRAIGHT SILICONE HOSE ASSEMBLY  
90 DEG SILICONE HOSE ASSEMBLY

**PLEASE CHECK ALL PARTS ARE PRESENT BEFORE STARTING THIS MODIFICATION**

- 1.** Open the bonnet and remove the engine cover.

- 2.** Remove the two highlighted nuts on the back side of the bonnet latch. On later manufactured cars we have found that these can be spot welded into place. To remove the nuts support the 10mm bolt head with a spanner and a 13mm on the nut. Tap the 13mm spanner with a hammer and the nut should become free. Alternatively an impact gun will make light work of removing the nut.

- 3.** Install the supplied catch can bracket to the car, re-using the factory bonnet latch hardware. Then install the catch can to the bracket.

- 4.** Locate the valve cover breather hose and disconnect it at both ends.

- 5.** Re-using the factory retaining clip from the 90 degree breather hose end, install the longer silicone hose to the intake pipe.

- 6.** Install the remaining hose to the valve cover port.

## CATCH CAN INSTALLATION GUIDE

REV 1. 2023

**7.**

Roughly route the hoses as shown below. Connect the valve cover hose to the upper catch can port, and the intake pipe hose to the lower port.

**8.**

At this point check that there is nothing rubbing or chafing the catch can or bracket. We have found that sometimes this coolant hose needs to be repositioned in its retaining clip.

**9.**

Install the engine cover and close the bonnet.

Now it's time to grab a drink... sit back... and admire your new catch can kit from HEL.

We always love to see what our customers have been up to, please tag us on our social media accounts and show off your automotive builds.
